5  en.wikipedia.org > wiki > Reverse\_DNS\_lookup

Reverse DNS lookup

A reverse DNS lookup or reverse DNS resolution (rDNS) is the querying technique of the Domain Name System (DNS) to determine the domain name associated..

ANSWER | PHIND INSTANT MODEL

Here are the key points about reverse DNS lookups based on the Wikipedia article:

What is Reverse DNS Lookup?

Reverse DNS lookup, also called reverse DNS resolution, is the process of determining the domain name associated with an IP address – essentially reversing the usual DNS lookup process  .

How Reverse DNS Works

- It uses PTR records stored in domain name registries and registrar tables 
- The reverse DNS database is rooted in the .arpa top-level domain 
- For IPv4 addresses, the process involves querying the .in-addr.arpa domain 

Historical Context

- The concept predates modern reverse DNS lookups 
- Older methods like inverse queries (IQUERY) are now obsolete 

IPv4 vs IPv6

- IPv4 uses .in-addr.arpa domain 
- IPv6 uses .ip6.arpa domain 

Multiple PTR Records

- DNS allows multiple PTR records per IP address 
- Used for virtual hosts, but can cause issues with UDP limits 

Uses

Common uses include:

- Network troubleshooting
- Email authentication
- Spam filtering
- Logging and monitoring 

Limitations

- Not all IP addresses have reverse DNS entries <sup>5</sup>
- Not required by internet standards <sup>5</sup>

The article provides a comprehensive overview of the concept, history, and practical applications of reverse DNS lookups. It covers both IPv4 and IPv6 implementations, as well as limitations and potential issues.

Phind Instant       

SUGGESTIONS ^

Can you explain how to perform a reverse DNS lookup using command line tools or APIs?

How can I check if a specific IP address has a reverse DNS entry?

What are some common challenges or errors that might occur during a reverse DNS lookup?

How does reverse DNS affect email deliverability and spam filtering?

Are there any security concerns related to reverse DNS lookups that users should be aware of?

The thing of the article I am looking for is an extension for a usual desk, so that it can be used as an office desk.

ANSWER | PHIND INSTANT MODEL

Based on the information provided, it seems you are looking for a Wikipedia article about an extension for a regular desk that can be used as an office desk. Here are the key points about this topic:

Extension Desks

An extension desk is a type of furniture designed to convert a regular desk into an office desk. These desks typically have the following features:

- They can be attached to or placed on top of existing furniture like dressers or bookshelves
- They provide additional workspace surface
- They allow for flexibility in office layouts
- They are often designed to be compact and space-efficient

Types of Extension Desks

There are several types of extension desks available:

- Laptop stands with fold-down keyboards
- Convertible desks that can switch between sitting and standing positions
- Pedestal desks with removable writing surfaces
- Wall-mounted desks that extend downward

Benefits

Extension desks offer several advantages:

- Increased productivity by providing more workspace
- Flexibility to adapt to changing needs
- Space-saving design for smaller offices
- Ability to repurpose existing furniture

Considerations

When selecting an extension desk, consider factors like:

- Durability and stability
- Adjustability of the extension mechanism
- Compatibility with existing furniture
- Ergonomics for comfort and safety

While the exact Wikipedia article you're looking for wasn't directly referenced, this information provides an overview of the concept of extension desks that can be used as office desks. You may want to search for terms like "extension desk" or "convertible desk" on Wikipedia to find more detailed information.

Phind Instant       

SUGGESTIONS ^

- Can you recommend specific brands or models of extension desks?
- How much additional workspace do these desks typically provide?
- Are there any safety concerns with using extension desks?
- Can extension desks be customized for different sizes or shapes of rooms?
- What is the average lifespan of an extension desk?

No, it is NOT an extension desk. It is made out of metal. Usually it placed below the desk. And it is has roles under it, so that it can be roled fort...

ANSWER | PHIND INSTANT MODEL

Based on your description, it sounds like you may be referring to a keyboard tray or keyboard drawer. Here are some key points about these types of office accessories:

Keyboard Trays/Drawers

Keyboard trays or drawers are typically made of metal and designed to fit under desks. They have the following characteristics:

- Made of metal (usually steel)
- Positioned under the desk
- Have rollers or glides to slide back and forth
- Provide additional workspace surface above the desk

Purpose and Benefits

Keyboard trays serve several purposes:

- Allow users to position their keyboard at a comfortable height
- Provide extra desk space above the keyboard
- Improve ergonomics by reducing neck strain from looking down at the keyboard
- Can be easily moved out from under the desk when needed

Types and Features

Some common types include:

- Fixed-position trays that stay in one place
- Adjustable trays that can move back and forth
- Drawers with dividers for organizing cables and accessories
- Some have built-in wrist rests or cable management features

Installation

Keyboard trays are usually installed under desks by office furniture installers. They often require custom fitting to ensure proper alignment with the desk.

Search Suggestion

If you're looking for more detailed information, you might try searching for "keyboard tray" or "under desk keyboard drawer" on Wikipedia or other online resources. These terms should help find articles about this specific office accessory.

Phind Instant       

SUGGESTIONS ^

- What is the typical size of a keyboard tray?
- How do I determine if my desk is compatible with a keyboard tray?
- Are there any ergonomic considerations to keep in mind when using a keyboard tray?
- How much weight can a keyboard tray hold?
- Can a keyboard tray be attached to a wall instead of a desk?

No, it is NOT a keyboard tray. It is much more big, out of metal and it has drawers to put office stuff in.

to Amazon’s home page.

Based on your description and the search results provided, it appears you may be referring to an under-desk file cabinet or pedestal drawer. Here’s what we can gather:

Under-Desk File Cabinet

An under-desk file cabinet is typically made of metal and has drawers that slide out from underneath the desk. It offers additional storage space for office supplies and documents. Key features include:

- Made of metal construction
- Positioned under the desk
- Has drawers that slide out for access
- Provides storage space for office supplies and documents

Benefits

Under-desk file cabinets offer several advantages:

- Additional storage without taking up valuable floor space
- Keeps frequently used items within easy reach
- Helps maintain an organized workspace

- Can be locked for security (in some models)

## Types and Features

Some under-desk file cabinets may include:

- Multiple drawers for various sizes of documents
- Locking mechanisms for security
- Adjustable shelves within drawers
- Some models have wheels for easy mobility

## Installation

These units are designed to fit under most standard desks. They often require some assembly and may need to be installed by someone familiar with office furniture setup.

## Search Suggestion

To find more detailed information about under-desk file cabinets or pedestal drawers, you might try searching for "under desk file cabinet" or "pedestal drawer" on Wikipedia or other online resources.

If this isn't exactly what you were looking for, please provide more details about the specific features or purpose of this office accessory, and I'll be happy to help further refine the description.

Phind Instant       

### SUGGESTIONS ^

How does the size of the under-desk file cabinet compare to a typical keyboard tray?

Can you recommend any specific brands or models of under-desk file cabinets with locking mechanisms?

Are there any safety precautions I should take when installing an under-desk file cabinet?

Is there a recommended weight capacity for items stored in the drawers?

Can I customize the number of drawers or adjust the size of the drawers in these units?

No, it is NOT a keyboard tray. It is much more big, out of metal and it has drawers to put office stuff in. E.g. biro, pensil and lineal.

Thank you for providing more information. Based on your description and the limited search results available, it seems you might be referring to an under-desk storage cart or drawer unit. Here's what we can gather:

Under-Desk Storage Cart/Drawer Unit

This office accessory typically has the following characteristics:

- Made of metal construction
- Positioned under desks
- Has drawers that slide out for access
- Designed with wheels or rollers for easy movement

Key Features

- Usually larger than a keyboard tray
- Multiple drawers for storing office supplies, documents, and personal items
- Wheels or rollers under the unit for easy movement
- Often used for storing pens, pencils, biros, paper clips, etc.

Benefits

- Additional storage space under the desk
- Keeps frequently used items within easy reach
- Helps maintain an organized workspace
- Can accommodate both office supplies and personal items

Usage

These units are commonly used by office workers to store:

- Writing instruments (pens, pencils, biros)
- Paper clips and other small office supplies
- Desk accessories like staplers or tape dispensers
- Small personal items

Installation

These units are designed to fit under most standard desks. They often require assembly and may need to be installed by someone familiar with office furniture setup.

If this isn't exactly what you were looking for, please provide more details about the specific features or purpose of this office accessory, and I'll be happy to help further refine the description.

to [Amazon's home page.](#)

Based on your repeated descriptions and the limited search results available, it seems you might be referring to an under-desk storage cart or drawer unit. Here's what we can gather:

### Under-Desk Storage Cart/Drawer Unit

This office accessory typically has the following characteristics:

- Made of metal construction
- Positioned under desks
- Has drawers that slide out for access
- Designed with wheels or rollers for easy movement

### Key Features

- Usually larger than a keyboard tray
- Multiple drawers for storing office supplies, documents, and personal items
- Wheels or rollers under the unit for easy movement
- Often used for storing pens, pencils, biros, paper clips, etc.

### Benefits

- Additional storage space under the desk
- Keeps frequently used items within easy reach
- Helps maintain an organized workspace
- Can accommodate both office supplies and personal items

### Usage

These units are commonly used by office workers to store:

- Writing instruments (pens, pencils, biros)
- Paper clips and other small office supplies
- Desk accessories like staplers or tape dispensers
- Small personal items

### Installation

These units are designed to fit under most standard desks. They often require assembly and may need to be installed by someone familiar with office furniture setup.

It's worth noting that furniture stores might categorize this item differently. They might indeed call it a "drawer container with roles under it," which aligns with your description.

If this isn't exactly what you were looking for, please provide more details about the specific features or purpose of this office accessory, and I'll be happy to help further refine the description.

Phind Instant       

SUGGESTIONS ^

- What materials are these under-desk storage carts typically made of?
- How many drawers do these units usually have?
- Are there any weight limits for the items that can be stored in these drawers?
- Can these units be customized with additional features or sizes?
- Are there any safety considerations that should be taken into account when using these units under a desk?
